DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "82" for the "safety nib" (page 8, line 11) and "70" for the "reset stop pin" (page 10, line 2). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 18-20 are objected to because of the following informalities: in claim 18, line 2 and claim 20, line 1, "scanable" should read --scannable--. Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-17 are allowed.

Art Unit: 3726

4. Claims 18-20 would be allowable if rewritten to overcome the objections set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach a tag apparatus and a tagging method wherein a probe device is connected to a tag applying device such that translational movement of the probe device produces rotational movement of a tag positioning device and at least one tag, these in combination with the rest of the limitations in the claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
